Mayank Balmoori

+91-8143108659 | balmoorimayank@gmail.com | LinkedIn | GitHub | Portfolio

Summary

AI-inclined full-stack engineer with production experience in healthcare data systems, real-time apps, and LLM-powered tools. Strong in React, Node.js, TypeScript, WebSockets, REST APIs, LLM API integration, and CS fundamentals.

Education

Vellore Institute of Technology (VIT) Vellore, India
Bachelor of Technology in Computer Science and Engineering; CGPA: 8.97 / 10 *Aug. 2023 – May 2027 (Expected)*

Experience

Software Engineer Intern May 2026 – July 2026
Providence India *Hyderabad, India*

- Redesigned file transfer in the Data Exchange Platform (DXP), a healthcare secured-transfer app, with chunk-based streaming that holds memory constant and removed a ∼2 GB ceiling that had blocked 50 GB+ production transfers.
- Implemented resumable FTPS/SFTP transfers with checkpoint recovery (REST offsets on non-seekable FTPS streams) and atomic `.tmp`-staging with rename, so interrupted jobs resume from the last chunk with no partial files.
- Built a T-SQL cron engine (5 stored procedures, 3 functions) scanning 2,500+ jobs against a deployment window in seconds, with L/W/# syntax and per-job error isolation; shipped in one week as the standard pre-release job-impact tool.
- Added a per-connection SFTP host-key toggle across DTOs, mappers, and handlers so operators can bypass checks safely during server migrations; documented designs via ADRs; worked in Agile sprints with full code reviews.

Full Stack Intern May 2025 – June 2025
OriginHash THub *Hyderabad, India*

- Architected and delivered 70% of the Web2 platform in the first month: React frontend, Node.js/Express backend, MongoDB.
- Designed scalable REST APIs; worked directly with the founder on requirements and architecture; shipped features end-to-end.
- Integrated OCR image text recognition model into node.js backend for image verification

Projects

QuickBolt | GitHub | *React, TypeScript, Node.js, Express, Claude API, WebContainer, Monaco* March 2026 – April 2026

- Built an AI web-app builder (Bolt.new-style): an Express backend uses Claude to classify the project type and generate a full project from a natural-language prompt via a structured system prompt.
- Parsed the model's XML output into file and shell steps, rendered a file tree in Monaco, and mounted files into an in-browser WebContainer to run `npm install/dev` with a live preview and no server-side execution.
- Supported iterative follow-up prompts by passing conversation history back to the model.

Canvix | GitHub | *React, TypeScript, Canvas API, WebSockets, Node.js, Turborepo* Feb. 2026 – April 2026

- Built a real-time collaborative whiteboard with multi-user drawing, shape manipulation, and room-based sync over WebSockets.
- Designed a dual-canvas architecture (preview and committed layers) for smooth drag, resize, and rotate without full re-renders; implemented event-based undo/redo instead of canvas snapshots to cut memory use.
- Structured as a Turborepo monorepo with shared TypeScript packages across React and Node.js; open-sourced.

HD Wallet Web App (ETH + SOL) | GitHub | *Next.js, TypeScript, Ethers.js, Solana Web3.js, BIP39* Sept. 2025 – Oct. 2025

- Built a multi-chain HD wallet generating Ethereum and Solana accounts from one BIP39 mnemonic (PBKDF2, BIP32, BIP44) using Ethers.js and Solana Web3.js; documented the build in a Hashnode write-up.

ChatApp | GitHub | *MERN Stack, WebSockets, Docker* Mar. 2025 – May 2025

- Developed a real-time anonymous chat app with room-based WebSocket messaging and automatic room/message cleanup when the last user leaves; containerized with Docker.

Technical Skills

Languages: JavaScript, TypeScript, Java, C, C++, SQL; familiar with C#, ASP.NET, T-SQL, FluentFTP, SSH.NET
Frontend: React.js, Next.js, Vite, Tailwind CSS, Monaco Editor, Canvas API
Backend & Databases: Node.js, Express.js, REST APIs, WebSockets, PostgreSQL, MongoDB
AI / LLM: Anthropic API (Claude), LLM Integration, Prompt Engineering, Structured Output Parsing, WebContainer API
Cloud & DevOps: Docker, AWS, Git, GitHub, Turborepo, Monorepos
Blockchain: Ethereum, Solana, Ethers.js, Solana Web3.js, BIP39, BIP44
Fundamentals: DSA, OS, Computer Networks, DBMS, OOP, System Design, Distributed Systems, Agile

Certifications

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional | *Oracle* Jul. 2025 (valid till Jul. 2027)
Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | *Oracle* Jun. 2025 (valid till Jun. 2027)
